Details what you have been doing to clean the soiled areas?

Have you used any physical punishment in response to house-soiling?
Rubbing nose in area, spanking, water pistol, shouting

What to Expect:

We understand that cats coming to the vet can be very stressful for them and their owners. We will let them relax in the exam room before starting their examination.

****If pre medications are needed for visit, please let us know**

We try to keep cats in the cat exam room. However, sometimes we will need to take them into the treatment area.

Please allow at least one hour for your appointment with Dr. Sammons.

Please try and schedule one cat appointment at a time.

Bringing multiple cats for appointments could cause some redirected aggression.
